

Ecommerce Website Package Details

Are you an individual or business looking to sell online? If so our ecommerce package is perfect. Our ecommerce software will allow you to fully maintain your web store online with no html experience required as well as being fully backed up by your very own Pebble Support Manager.

Our Shopping Cart solution is the most feature rich, all-in-one shopping cart software available. It has an enterprise-grade feature set and is trusted by more than 15,000 businesses in over 65 countries.

We have 3 ecommerce packages; these are based on the features and the amount of products you wish to sell online. Speak to one of our friendly staff today about the differences in our package options and the best one for you and your business.

To speak to one of our friendly team about our ecommerce package, please call Pebble on **01733 367799** or visit our website at **www.pebbleltd.co.uk**

* Website hosting is free for the first year and then charged at £75 per year.

** Your chosen domain name is purchased on your behalf and is registered for 1 year. It is then charged at £15.50 per year.

*** Training carried out at our Peterborough office. Training takes up to 2 hours

Pebble will speak to you about your requirements.

Technical Details

Where a website uses a lot of hi-resolution images or video content we utilise Amazon's S3 Content Delivery Network to serve up these media types which have multiple datacentres around the world.

Website Backups

All websites and databases are backed up every 4 hours although if you would like a more frequent backup, this can be arranged. All servers are protected against power outages by N+1 UPS and 6500BHP diesel engine backup generators specifically designed for use in national grid stations.

365/24/7 Server Monitoring

Network, servers and services are continually monitored from external systems at 30 second intervals. If any servers or services do not respond, 24/7 technicians are sent emails and SMS text messages from automated monitoring systems to begin working on fixing any issue within minutes.

Website Uptime It is important that your website has the maximum uptime; we take this very seriously and can guarantee 99.9% uptime *

* Circumstances beyond reasonable control, including, without limitation, acts of any governmental body, war, insurrection, sabotage, embargo, fire, flood, strike or other labour disturbance, unavailability, interruption or delay in telecommunications will invalidate our guaranteed uptime.
